

guess is Riddle Question

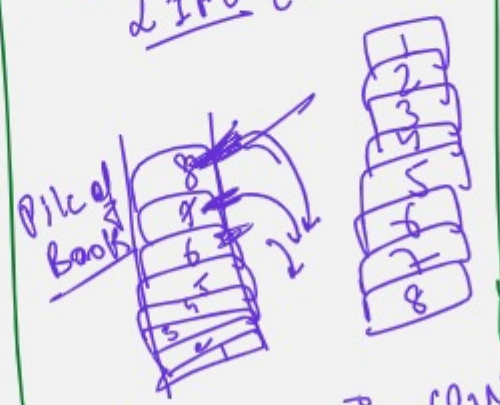

hangst ~ 1/8

arr ~ 6  
 while stack is not empty:  
 elem = stack.pop() <sup>(len)</sup>  
 if (elem == target)  
 print(elem)  
 break;

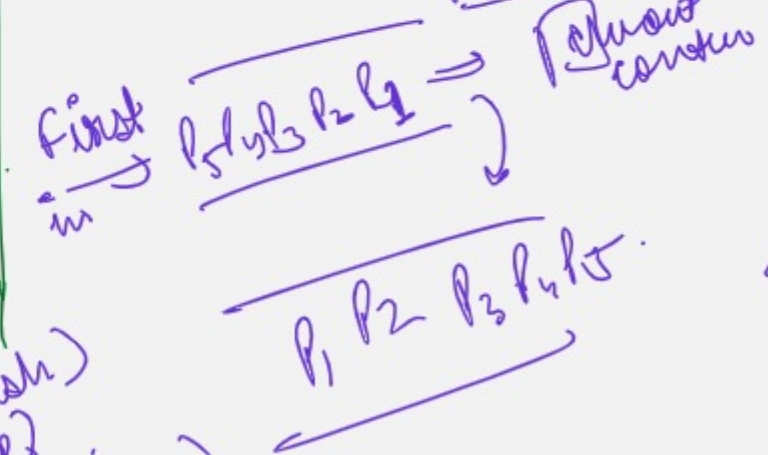

class, arrays

Stack FIFO (first in first out)  
LIFO (last in first out)

operations  
 → insertion (push)  
 → delete (pop)  
 → create  
 → peek (top element)

Queue FIFO (first in first out)

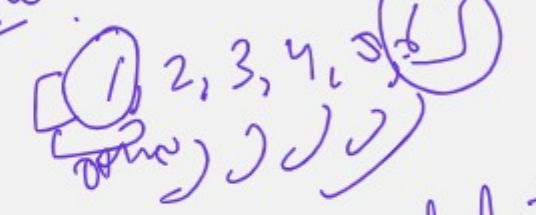

Can't add in middle  
and remove X

→ inbuilt collection from python.  
 (deque) (double ended queue)

operations  
 → insert (enqueue)  
 → delete (deque)  
 → create  
 → Rear (last element)

delete
